

Solutions Customers Count On

Seamless travel is the magic word: from booking and paying for parking online to easily navigating to the garage and quickly finding a space, in addition to obtaining the latest departure times upon arrival in the garage. By enabling customers to "check-in" promptly at the garage you can increase throughput and ensure that air travellers are happy and relaxed.

SKIDATA provides solutions ideal for any size airport – from regional airports to international hubs such as Hong Kong or London Heathrow.

SKIDATA – Now the Trip Can Begin!

Our contribution: controlled parking solutions, flexible pricing depending on utilization or distance from terminal, integration of booking platforms or frequent flyer programs, reports and analyses of passenger behavior, rebate solutions for airport shopping, additional services such as charging electric vehicles. Invest in your future – Play it safe with SKIDATA!

Your Benefits

Cost-effective operation	based on state-of-the-art technology
Efficiency	through intelligent remote monitoring and proactive service management (SKIDATA Operator Services)
Fraud protection	and easily aligned with the airport's security concept (e.g., license plate recognition)
Integration of third-party solutions	such as ERP, CRM, license plate recognition, parking space identification
Business intelligence	through centralized data management (SKIDATA Management.Services)
Increased customer convenience	with integrated internet-based booking and reservation platforms and onsite parking services.
User-friendly solutions	e.g., pay by credit card, linking of Miles&More bonus programs
